Costro Lac Powder

Costro Lac Powder is a probiotic, vitamin and trace mineral supplement that encourages appetite and promotes a healthy gut microflora. It mixes easily, and can be increased or decreased depending on the severity of the disease problem. It replaces any need for Vitamins A, D³, E or C supplements.

Features & Benefits

- Powder form for use in whole milk or milk replacers.
- Use daily for 3 to 7 days.
- A source of live, naturally occurring microorganisms.
- Source of Vitamin A, D3, E and C.
- Added enzyme for less upset stomach.
- Mixes easily.
- Quick response with improved appetite.
- Improves health where scours are a problem.
- Decreases medical costs, decreases morbidity and mortality.

Overview

Costro Lac Powder is useful in limiting disease outbreaks at your dairy. On many dairies, calves come down with health problems at 3, 7, 11 and 21 days of age. Unfortunately, it usually is not just one or two calves, but 10 to 50 percent of the entire herd. Costro Lac Powder is designed to help prevent many of these health problems. It can make a difference between saving and losing your calves. Costro Lac Powder can be mixed in whole milk or milk replacers. It is a probiotic, vitamin and trace mineral supplement that encourages appetite and promotes a healthy gut microflora. It mixes easily, and can be increased or decreased depending on the severity of the disease problem. It replaces any need for Vitamins A, D³, E or C supplements.
