- Use any time feline shows signs of poor mobility.

Overview

Fe-Line Maxie Flex is a formula designed with optimum joint and muscle health in mind for both young active cats and older cats already faced with signs of aging. Fe-Line Maxie Flex contains MSM, Glucosamine Sulfate and Chondroitin Sulfate. These ingredients have been shown in studies to not only relieve joint stiffness, but to increase blood flow and reduce inflammation. The ingredients in Fe-Line Maxie Flex can be fed early in life as a preventative measure or later in life to help with signs of stiffness and aging. Fe-Line Maxie Flex is a joint supplement that works and can help your cat make the most of its years.
