- Gives added protection to the immune system.
- Passive immunity.
- Lowers medication costs.
- Decreases morbidity and mortality.

## Overview

Gold Label Whey is manufactured using the colostrum that is produced at Grade A dairies. It is then pooled, tested and processed into whey. Gold Label Whey gives supportive therapy to every disease a cow was exposed to during gestation and was able to make antibodies for. Gold Label Whey discourages the growth of E. Coli and Salmonella. It also reduces instances of scours and pneumonia and reduces inflammation related health problems. It should be used as a supportive therapy to drugs. It is all-natural so there is no withdrawal time.
