- Improved vitality.
- A great product for show animals.

Overview

Nutrishine is a product requested by veterinarians. They needed a product to help with a dull coat and flaky skin and Nutrishine does just that. It contains a balanced source of Omega 3 and Omega 6 fatty acids, biotin, vitamin A, D and E and small chain fatty acids to give nourishment to the skin. Biotin maintains and repairs the skin, hair and proper nerve function. Nutrishine is the whole package. It helps to support and correct underlying issues causing the animal to have a dull, flaky coat and at the same time improves overall health.
