

Cryp-To-Cal

Cryp-To-Cal helps to reduce the amount of weight loss associated with calves that suffer from Crypto. As yearlings, calves with Crypto typically weigh 20 to 200 pounds less than healthy calves who haven't had Crypto.

Features & Benefits

- All natural. No withdraw.
- For operation with brown scour problems.
- To be used along with your veterinarian's recommendation.
- Mix in Colostrum, milk or milk replacer.
- The black color is normal.
- Decreases mortality.
- For farms with a history of scours.
- Don't look for a miracle, but Cryp-To-Cal could be the difference.

Overview

Cryp-To-Cal isn't a drug, but it will help to reduce the amount of weight loss that calves with Crypto typically experience. It contains probiotics to help maintain the microflora count in the calf's gut. It also contains an enzyme to help with digestion, which is a real problem in sick calves. It also helps the calves to maintain appetite during and after the looseness has returned to normal.
