

C-Tech[®] Equine Paste

C-Tech Equine Paste is an all-natural probiotic paste that is designed to be used in times of increased stress when a direct fed probiotic may not be enough or is not an option. It contains several of the most beneficial strains of probiotics and can be used as many times as necessary.

Features and Benefits

- Provides natural support for horses that have been stressed.
- Helps a horse's body to repair upset digestive tracts and restore proper pH and microflora balance.
- Helps to reduce the harmful effects of antibiotics, vaccines, worming, and foaling.
- Made from high quality ingredients to ensure proper digestion and absorption.
- Helps to stabilize the stomach and reduce the duration of diarrhea.
- Contains ingredients and nutrients necessary to help the probiotics establish healthy cultures.
- Palatable formula in an easy-to-administer tube.
- Great for foals at birth to establish a healthy gut, as well as horses traveling long distances.

Overview

C-Tech Equine Paste is a wonderful product that helps any animal experiencing health problems or lack of appetite. It contains a live source of probiotics. C-Tech Equine Paste has been reformulated so that it is more effective and easier to use. It helps to establish gut microflora and is great for anyone who is traveling a lot. It is best when used in times of extreme stress. It can be given to foals at birth to help establish a healthy gut microflora, and is an essential tool to help weanlings settle in and create appetite. It helps horses to better digest their food and provides all the benefits of probiotics in an easy-to-use tube.

On left: A 3 week old foal saved by the use of C-Tech Equine Paste. You can see the hair missing from an extreme case of scours.
