- Contains Enzymes and Yeast to Help Maintain Gut Function.
- Is All Natural, Safe and Effective.
- Palatable Formula that can be Top Dressed or Mixed in.

**Get more from your feed.  
Use Zyesta Plus!**

## Overview

Zyesta Plus is a feed additive that helps to improve your feed efficiency. In other words, it helps your horses to better digest the feed that they are eating. Customers report that they are able to reduce the amount of grain fed by one quarter pound. In a day, that is one half pound less grain, and over the course of the month, you have fed 14 pounds less feed with the same results. And that is just one horse! Zyesta Plus improves the digestibility of different plant matter and improves the nutrient absorption rate increasing the amount of usable material in all feed-stuffs, including hay. What this does is reduces the amount of feed you need to feed to get the same amount of nutrition. Zyesta Plus is cost effective. It costs about four cents per day per head. Factor in the feed savings and Zyesta Plus will more than pay for itself. Zyesta Plus also can be used with horses that are unable to properly chew their food, or are elderly and need some help breaking down feed stuffs.
