

Fe-Line Kitten Costro Milk

Fe-Line Kitten Costro Milk is designed to be used between colostrum and regular milk. It is normally used from day 7 on to supplement queen's milk or regular cat food.

Features & Benefits

- Use to supplement queen's own milk.
- Supplements kitten's nutritional needs during weaning period.
- Ph adjusted to help reduce the chance of scours.
- Mixes in lukewarm water (110 degrees Fahrenheit).
- With older felines, use as treat. Top dress on regular food.
- Very easy to digest.
- Decreases chance of digestive problems.
- Decreases morbidity and mortality.
- Normally lowers medication costs.
- Very cost effective.
- Kitten should have its mother's own colostrum if possible.

Overview

Fe-Line Kitten Costro milk is a nutritionally complete milk replacer that can be used in many different situations. It is designed to be used to supplement the Queen's milk when she just doesn't have enough milk to go around. It is great for the smaller kitten who may not be strong enough to get all it needs. It is also a great milk replacer for orphan kittens after the first week of life. Fe-Line Kitten Costro milk supplies kittens with the essential amounts of protein, fat and carbohydrates as well as vitamins, minerals and amino acids necessary for growth and optimum health. Fe-Line Kitten Costro milk utilizes a highly-digestible source or dried milk.
