Overview

K-Nine Joint Muscle Flex is a formula like no other. It is designed with optimum joint and muscle health in mind. It works for both young active dogs and older dogs already showing signs of arthritis. K-Nine Joint Muscle Flex contains MSM, Glucosamine Sulfate and Chondroitin Sulfate. These ingredients have been shown in studies to not only relieve joint stiffness, but to increase blood flow and reduce inflammation. K-Nine Joint Muscle Flex can be fed early in life as a preventative measure, or at higher levels later in life as a therapeutic supplement.
