

Microbios® Odor Digest

Microbios Odor Digest is a liquid waste and odor treatment product that utilizes natural bacteria, enzymes and fungi to break down manure and reduce odor. It contains enzymes, yucca juice and bacteria that help to reduce solids in lagoons and pits. It also can be sprayed on walkways to decrease build up.

Features & Benefits

- Liquid. Just spray over water area and walkway.
- Contains enzymes, yucca juice and bacteria.
- May be used in lagoons and pits to reduce solids.
- Could be the best product available for waste piles.
- Very cost effective.
- Helps to reduce odor up to 50 percent.
- Decreases build up on walkways.
- Increases value of waste to be used as fertilizer.
- In general, you will notice less odor, which in turn creates a more environmentally friendly work place.

Product Code and Sizes

07-185	1 Gallon Jug
07-528	4-1 Gallon Jug Case

Ingredients

Natural Bacteria, Enzymes and Fungi.

Application Instructions

For the most effective performance, spray needed level of Microbios Odor Digest over the surface area of pits and lagoons. This will minimize surface crusting. Apply 2 lbs. (32 oz.) for each 18,000 gallons of waste. Repeat every month for waste digestion and every two weeks for odor digestion when needed.

Shake or stir the jug before usage.

To determine the volume of your holding facility, multiply the length x width x depth. Then multiply the cubic feet x 7.5 to determine the number of gallons in your lagoon or pit.
