- Use when extra energy is needed.
- Keeps cow's energy levels up to help her recover from calving.
- Provides quick energy when used during times of stress.
- Reduces loss in feedlot sick pens.
- Helps to provide energy during times of treatment for diseases.

Overview

Ruminant Energy Plus is for cattle that need additional energy and have a fully developed rumen. It helps maintain normal glucose levels and can be used anytime energy is needed. It provides a quick source of energy during drug treatment and is great for sick animals. It is also great for any animal that had a tough time giving birth, and is formulated to restore energy and nutrition levels when an animal is under stress. It is particularly useful for animals in a weakened condition due to shipping, receiving, or disease.
