

Microbios Septic Kare

Microbios Septic Kare is a one of a kind product designed to reduce sludge and solid waste build up in not only septic tanks, but sewer lines as well. Microbios Septic Kare is an all natural, non-caustic, safe and efficient way to reduce the number of times your septic tank will need pumped over the course of its lifetime. We use a unique blend of microbes, bacteria, enzymes, fungi and yeast to break up sludge and manure. Long-time users of Microbios Septic Kare report that when they had their tanks pumped, that it was virtually free of solids.
