

# Sheep & Goat Capsules

Sheep & Goat Capsules are designed for goats that face challenges while freshening. The capsules provide the supportive measures a freshening sheep needs to make the transition without complications.

## Features & Benefits

- A source of live, naturally occurring microorganisms.
- Contains high levels of vitamins A, D3, E and C.
- Ph adjusted to encourage normal microflora.
- Capsules are all natural and dissolve in 20 to 60 minutes.
- Very cost effective.
- Encourages appetite.
- Helps to maintain a balanced microflora.
- Works to replenish microorganisms after drug treatment.
- Especially beneficial during times of stress.

## Overview

Prevention is the best policy and that is why every goat needs a Sheep & Goat Capsules. Loss of appetite, milk fever and ketosis are just a few of the problems a goat faces when freshening. These capsules are designed to provide support to the goats to help get through the transition phase without complications.
